

Osmocote[®] Exact Tablet

Pre-measured controlled release fertilizer tablets for hanging baskets and container grown plants

- World-famous Osmocote Exact in tablet form
- For hanging baskets and all container grown plants
- Pre-measured tablets of 5g or 7.5g
- Feeds continuously for 5-6 months or 8-9 months

What are Osmocote Exact Tablets?

Osmocote Exact Tablets use the same third generation controlled release fertilizer technology found in the Osmocote Exact range giving up to nine months of continuous feeding.

The 15+9+9 is perfectly balanced for all types of container grown plants, while Magnesium and trace elements also present in the formulation help establishment and season-long flowering.

Accuracy of dose is guaranteed, so refertilization is eliminated, labour and application rate errors reduced.

How to use Osmocote Exact Tablets
