

Growing Solutions

The Scotts Easy Guide: Optimising The Growth Of Field Grown Roses

Agroblen ensures a balance of nutrients throughout the growing season. The rates of application apply to growing both the rootstock and growing on after budding. Reduced environmental impact through minimal leaching.

Optimising The Growth of Roses Over a 2 Year Period

- Use Agroblen Total 15+8+16 5-6 month.
- Rate 225-300 kg/ha.
- Apply either as a drill or as a band preferably by hand machine or tractor mounted machine taking care granules are not damaged.
- One application per season.

Agroblen is a blend of slow release fertilisers, controlled release fertilisers (utilising temperature) together with a percentage of non coated available fertiliser designed to release nutrients over the whole season.
