

Growing Solutions

The Scotts Easy Guide: Poinsettia Feeding

- Establish required plant size for market.
- Plant rooted cuttings in Levington Pro Pot Plant compost.
- Start feeding after 10 days with Scotts Peters Excel High K 13+5+20+7CaO+2MgO+Te.

NOTE: Poinsettia need a lot of calcium so it is best to use the soft water analysis.

- Assess growth weekly.
- **Too Small?**
 - Change to Scotts Peters Excel standard 15+5+15+7CaO+3MgO+Te.
- **Too Big?**
 - Return to High K feed and if necessary apply plant growth regulator spray.
- **Bracts Turning Colour?**
 - Return to High K feed.
