The above mixes indicate physical and chemical compatibility.

Individual products within the mix should be applied according to their label recommendations. Do not exceed application rates for the selected situation and follow label advice and restrictions as appropriate.

() = Numbers in brackets indicate compatible water volumes for both product mix.

X = Not compatible / not appropriate water volumes.

¹ Do not exceed individual product rates. Do not exceed 120 L/Ha for combined total Greenmaster Liquid product input or 60 L/Ha for speciality Greenmaster Liquids (STEP/Effect/Ca-Booster).

² These are physically compatible, however, mix is applied at the users own risk.
