

Growing Solutions

The Scotts Easy Guide: Feeding Field Grown Trees

Agroblen ensures a balance of nutrients throughout the growing season. This results in continuous growth. Reduced environmental impact through minimal leaching.

- Use Agroblen Total 15+8+16 5-6 months.
- Rate 500-1,000 kg/ha.
- Apply either as a drill or as a band preferably by hand machine or tractor mounted machine.
- One application per season.
- Balanced growth.

Agroblen is a blend of slow release fertilisers (utilising bacteria) and controlled release fertilisers (utilising temperature) designed to release nutrients over the whole season.
