The Scotts Easy Guide: Top Dressing With Osmocote Start

Boost growth in the spring or after heavy rain has temporarily washed out all available nutrients.

- Osmocote Start is a 6 week controlled release fertiliser capable of boosting growth when plants are looking hungry.
- Safe to use and will not scorch leaves or roots, unlike conventional fertilisers.
- High potassium so leaf colour and strength are improved
- Apply at :-
 - 40-60g/m² Pot plants
 - 80g/m² Cuttings
 - 50-60g/m² Vegetables
 - 100-120g/m² Nursery stock
- Use 14 days before sale to improve appearance and provide some shelf life.
- Scotts Handy Spreader available to use as a low cost applicator.
