

Growing Solutions

The Scotts Easy Guide: High Quality Autumn Bedding (Pansy, Primula & Polyanthus)

How to maintain compact growth, good leaf colour and easy management for Autumn and Spring sales.

- With warm late summer and Autumn temperatures, conventional feeding practice tends to produce large leafy plants.
- Use **Osmocote Exact Hi-K** controlled release fertiliser, keeping nitrogen levels low whilst maintaining a good quality plant.
- Autumn sales use Osmocote Exact Hi-K 5-6 month at 2 to 2.5 kg/m³.
- Spring sales use Osmocote Exact Hi-K 8-9 month at 3 to 3.5 kg/m³.

Using Osmocote Exact Hi-K controlled release fertiliser still allows the option of boosting growth at the end of the crop using Peters water soluble fertilisers. This flexible approach optimises crop management.
